Discount on Compliance Support Services

Getting the process wrong for any of these can result in not meeting regulatory standards, not being compliant and possibly a claim in the Employment Tribunal – don't get caught out – take our advice.

***Prices include VAT. The service is for a minimum of two years. If a site visit is required, these expenses will be an additional cost.**

****Conditions apply**

ADDITIONAL COMPLIANCE SUPPORT SERVICES

Due Diligence Audit

This Audit includes a thorough review of compliance documents including the CQC registration status, the compliance aspect of any HR files, a review of the Health & Safety control, infection control, risk assessment compliance, equipment maintenance and suitability, and a full review of all existing contracts with external suppliers. Once the audit has been completed you will receive an informative written report.

Compliance Audit

A full compliance audit to assess current level of practice compliance followed by a detailed written audit and action plan. If required, we can assist implementing the recommended changes.

CQC Inspection Preparation & Fit Person Interview Coaching

A full review of your compliance documentation will be carried out remotely, along with a virtual walk-through discussion of current practice processes. Followed by a role play styled Q&A over teams to prepare for the interview. You will be given a clear action plan with recommendations to ensure a confident team and a prepared practice.

Annual Mock CQC Inspection

A realistic simulation of a CQC inspection will be carried out, this will include auditing decontamination processes, clinical environment and infection prevention processes. On completion of the mock inspection, you will receive feedback stating strengths and weaknesses and a practical action plan.

Annual NHS Infection Control Audit

Ensure your dental practice meets the highest standards of cleanliness, compliance and patient safety with our comprehensive NHS Infection Control Audit. Our in depth assessment identifies areas of non-compliance, highlights best practice and support your team in achieving and maintaining excellence.

New Practice/Squat Practice Set-up

Comprehensive support from your initial CQC registration to full premises and operational compliance. Including documentation, log books, process guidance, interview preparation, feedback on the design of the practice, ensuring you have the correct flow for H&S and audits on the set-up of the decontamination room to ensure HTM01-05 compliant.
